

KRAMES Exit-Writer™

A step-by-step guide to using
Krames Exit-Writer®.

Select Instructions.

The Instructions Screen provides easy access to 1,500+ discharge topics — each in English and Spanish (more than 3,000 discharge instructions in all) — including 150 in Chinese, Vietnamese and Russian and 200+ lab tests.

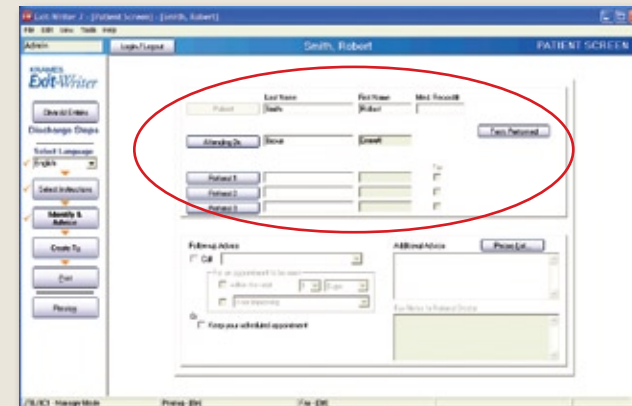

1. Select your language from the dropdown menu on the left hand side of the interface.
2. Click the **Select Instructions** button.
3. Use the tabs to select the type of instructions or forms.
4. Highlight a title and click the right arrow to add it to the print list.
5. To permanently or temporarily edit instructions, click on the corresponding button, make your changes and save in your own list.

Timesaving tips:

- Eliminate excessive scrolling by selecting a specialty area
- Start typing in the search field to advance to titles beginning with those letters
- Look for related topics in the field below the main titles list

Enter Patient/Physician Information.

The Patient Screen allows you to quickly enter or access patient and physician information, special instructions and notes.

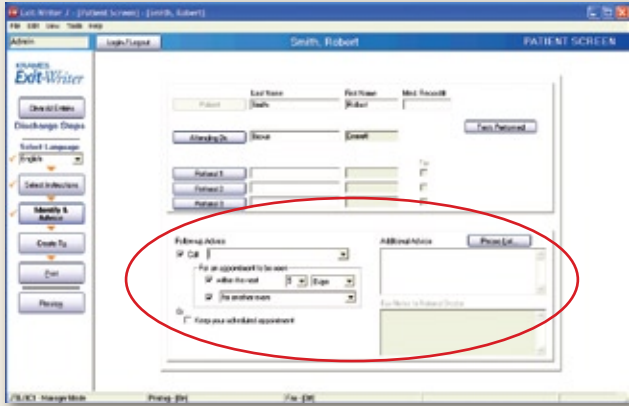

1. Click the **Identify & Advise** button on the left-hand navigation.
2. Enter the patient, attending physician and referral doctor(s) in the fields provided or click on the buttons to import saved information.
3. To automatically fax a summary of care to a referral doctor, click on the box next to his or her name.
4. Click **Tests Performed** to pull up a listing of tests you can include in the care summary.

Timesaving tip:

An HL-7 option automatically enters physician and patient information from your EMR. If you don't currently have this feature, contact your Krames representative at 800-598-7258 about adding it.

Include Follow-up Advice.

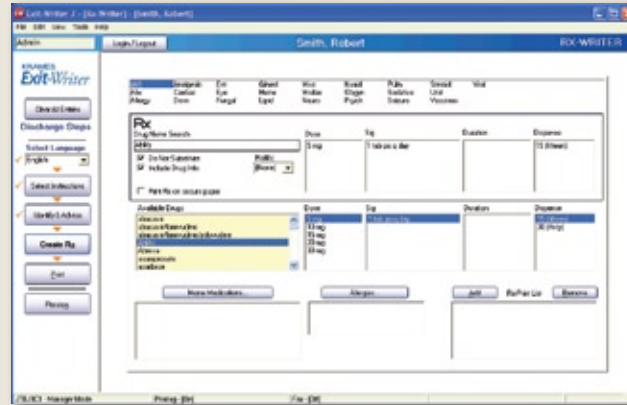

Krames Exit-Writer makes providing follow-up advice to patients and notes to referral physicians fast and easy. And these features can be accessed right from the Patient Screen.

1. Use the checkboxes and dropdown menus to indicate how and when the patient is to follow-up.
2. To include additional advice, select commonly used phrases from the pre-populated **Phrase List** or type your own free text in the space provided.
3. If you selected the fax-to-referral-physician option, you can type additional notes to him or her in the space provided.

Create Prescriptions.

Krames Exit-Writer reduces clinician time spent hand-writing prescription medications and receiving calls from confused pharmacists. Use the prescription-writing feature to create legible and accurate prescriptions quickly and easily.

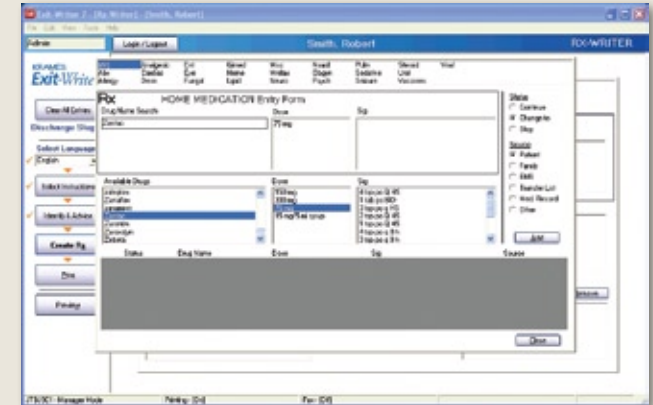

1. Select the drug name from a pre-populated listing.
2. Click on the preferred dosing information.
3. Specify the number of refills and whether substitutions are allowed.
4. Click **Add** to include in the print list.

Timesaving tips:

- Eliminate excessive scrolling by selecting a specialty area
- Start typing in the search field to advance to drugs beginning with those letters
- Check the box(es) by the prescribed drug(s) to include education, and save time over selecting both separately

Document Medication Status.

Krames Exit-Writer's Medication Reconciliation Tool provides your facility a fast and easy way to document and provide clear patient medication status. An electronic copy of all information provided to the patient is captured in the patient record.

1. Click on **Home Medications**.
2. Select a drug from the listing provided.
3. Select the dosage.
4. Select the status and source of the information from the options on the right.
5. Click **Add**.

To change any of the information after a drug has been added, use the dropdown menus.
